

# How to modify the opacity of a map or layer?

To modify the opacity of any displayed map or layer:

- Click on the **“Maps & layers”** <sup>1</sup> menu and select **“Displayed maps”** <sup>2</sup>;
- Click on the **“Opacity”** <sup>3</sup> button of the map or layer you want to modify the opacity;
- Move the **“Opacity slider”** <sup>4</sup> to adjust the opacity. The display is updated in real time to reflect your settings.

<sup>i</sup> The opacity setting will be forgotten as soon as you un-display the map. In order to save it you can create a [favorite map](#).

# How to switch between two maps in one click?

You can use the opacity setting explained just above to quickly switch between two displayed maps in one single click:

- Display your two maps at the same time, by [adding the second map on top as a layer](#);
- Click on the **“Opacity”** <sup>1</sup> button of the top map;
- Setting a opacity of **“100%”** <sup>2</sup> will only display the top map;
- Setting a opacity of **“0%”** <sup>3</sup> will only display the bottom map.
