

How to clear stored data?

All the data you store for a map (by displaying it or using [the store area tool](#)) is added to its local storage space which will grow on demand. At any time, you can delete this data:

- Tap on the “**Maps & Layers**” **1** menu, and on “**Available maps**” **2** to list all your maps;
- If you want to delete the data of a single map, long-press it **3** or tap its menu icon **4**;
- If you want to delete all the stored data of a maps group, long-press it **5** or tap its menu icon **6**;
- Tap “**Clear data**” **7**;
- Tap “**Yes**” to confirm your action.

i If the selected map were currently displayed, it will be removed from the displayed maps.

i This action will clear all the data of the selected map. In order to store and clear data by pieces, you need to use [workspaces](#).
