

The Map Center Point

The map center icon shows the exact map center location, which coordinates are given in the coordinates information box.

When you tap it, the map center point menu is displayed, allowing you to manage [the current target](#), [create placemarks](#) or access tools.

You can add or edit shortcuts for the **Create a placemark** and **Tools** entries:

- Tap the map center point icon **1** to display the map center point menu;
- To add a new shortcut for one entry, long press-it **2**, and choose a shortcut item from the list **3**;
- To edit an existing shortcut, long-press it **4** and choose a new item;
- To delete an existing shortcut, long-press it **4** and choose **Delete** **5**;
